

You're Invited to a Physician CME, Nurse and Registered Dietitian CE Group Viewing Event

Should We Try to Save 22 Weekers?

Survival rates are improving for neonates born at ≤ 22 weeks through implementation of innovative active lifesaving treatment protocols. The most significant common denominator to improve the chance of survival is having an actual resuscitation plan in place. **John D. Lantos, MD**, discusses active treatment protocols, which require an institutional commitment with collaboration between maternal fetal medicine specialists, NICUs, and Tiny Baby Units within the NICU. Dr. Lantos also describes the need for continued clinical studies of supporting evidence for specific protocols that will continue to increase survival of the lowest gestational-age neonates.

Accreditation and Certification

The Annenberg Center for Health Sciences at Eisenhower is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

Credit Designation-Enduring Material

The Annenberg Center for Health Sciences at Eisenhower designates this enduring material for a maximum of 1.0 *AMA PRA Category 1 Credit*[™]. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

 American Association of Nurse Practitioners
Annenberg Center for Health Sciences is accredited by the American Association of Nurse Practitioners as an approved provider of nurse practitioner continuing education. Provider number: 040207. This program is accredited for 1.0 contact hour. Program ID #5709-2EM.

Annenberg Center for Health Sciences is accredited as a provider of continuing nursing education by the American Nurses Credentialing Center's Commission on Accreditation.

A maximum of 1.0 contact hour may be earned for successful completion of this activity.

Provider is approved by the California Board of Registered Nursing, Provider #13664, for 1.0 contact hour.

Annenberg Center for Health Sciences at Eisenhower is a Continuing Professional Education (CPE) Accredited Provider with the Commission on Dietetic Registration (CDR). Registered dietitians (RDs) and dietetic technicians, registered (DTRs) will receive 1.0 continuing professional education unit (CPEU) for completion of this program/material. Provider number AC857 Activity number #153704

Learning Objectives

At the conclusion of this activity, participants should be better able to:

- Recognize that survival rates for neonates born at 22 weeks are improving with better outcomes
- Describe the need and cost-effectiveness of active treatment protocols to improve survival rates for neonates born at $\leq 22-24$ weeks
