

You're Invited to a Physician CME, Nurse, Registered Dietitian and CE Group Viewing Event

Neonate Feeding Regimens and the Expanding Role of Lactoferrin

Human breast milk is the gold standard, providing a myriad of health benefits. Lactoferrin, which is found in high concentration in mammalian milk, is a multifunctional glycoprotein that has antimicrobial and immunomodulatory properties. Paolo Manzoni, MD, PhD, explains its critical role in protecting neonates against infection.

Historically, lactoferrin has been low in infant formula due to lower levels in bovine milk; however, advanced technology concentrated bovine lactoferrin in formula. Data show how much lactoferrin is needed, and when it is appropriate to supplement. Lactoferrin supplementation—human or bovine—appears to have measurable clinical benefits. Although inconsistencies exist among major RCTs in terms of lactoferrin efficacy, in study results, Dr. Manzoni identifies various heterogeneity as a cause.

Accreditation and Certification

The Annenberg Center for Health Sciences at Eisenhower is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

Annenberg Center for Health Sciences is accredited as a provider of continuing nursing education by the American Nurses Credentialing Center's Commission on Accreditation.

A maximum of 1.0 contact hour may be earned for successful completion of this activity.

Credit Designation—Enduring Material

The Annenberg Center for Health Sciences at Eisenhower designates this enduring material for a maximum of 1.0 *AMA PRA Category 1 Credit*[™]. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Provider is approved by the California Board of Registered Nursing, Provider #13664, for 1.0 contact hour.

Annenberg Center for Health Sciences at Eisenhower is a Continuing Professional Education (CPE) Accredited Provider with the Commission on Dietetic Registration (CDR). Registered dietitians (RDs) and dietetic technicians, registered (DTRs) will receive 1.0 continuing professional education unit (CPEU) for completion of this program/material.

Provider number: AC857
Activity number: 155851

 **AANP PROVIDER** | American Association of Nurse Practitioners
Annenberg Center for Health Sciences is accredited by the American Association of Nurse Practitioners as an approved provider of nurse practitioner continuing education.
Provider number: 040207.
This program is accredited for 1.0 contact hour.
Program ID: 5729-EM.

Learning Objectives

At the conclusion of this activity, participants should be better able to:

- Evaluate clinical research that is expanding the understanding of the physiological and developmental properties of lactoferrin
- Develop evidence-based NICU feeding regimens with lactoferrin
