

You're Invited to a Physician CME, Nurse, and Registered Dietitian CE Group Viewing Event

Care of Periviable Infants

Survival for periviable infants is improving. Neonatal intensive care specialist, **Jonathan Klein, MD**, shares his expertise and strategies to care for these extremely premature infants at 22–24 weeks' estimated gestational age. Multidisciplinary teamwork and standardization of practice are essential strategies to allow extremely preterm infants the potential to survive and thrive. Join Dr. Klein's examination of the survival, morbidity, and 2-year outcomes for periviable infants at a center with a proactive philosophical approach, as well as his review of NICU practice improvements, including the critical use of antenatal corticosteroids prior to 24 weeks.
