Intestinal Failure in Infants: Managing the Transition From Total Parenteral Nutrition A Case-Based Program

Mark Corkins, MD, and Anna Featherston Tuttle, MS, RD, LDN, CNSC, provide an overview of intestinal failure (IF) in infants and a detailed, case-based discussion of nutrition management. Topics include causes and outcomes of IF, nutrition goals, assessment of infants with IF, pharmacotherapeutic options, and nutritional management. Practical recommendations for initiating and then weaning from parenteral to enteral nutrition are discussed, alongside the key guiding principles of maximizing enteral feeds in infants with short bowel syndrome and other forms of IF.
