## Food Allergy Tests Are Not Screening Tests

Presented by David R. Stukus, MD

### This education is about:

- Defining food allergy
- Reviewing diagnostic criteria for food allergy
- Identifying the limitations of allergy tests that is currently available
- Identify applications in clinical practice

### Why it matters:

As caregivers are presented with a variety of direct-to-consumer allergy and intolerance testing options, it is essential that healthcare providers are prepared to answer questions about the validity of these direct-to-consumer tests and the role of testing in diagnosing food allergy. It is also essential to understand the role of the validated testing options and their limitations.
